SUMMARY

Frontend developer with 4+ years of experience building production React and Next.js applications in TypeScript. Currently building MasterBrand's **Rebode** kitchen-planning platform (**20K+ monthly active users**), where I built and maintain the shared navigation component library consumed by **4 Next.js applications**. Strong in component architecture, state management, headless-CMS integration, analytics instrumentation and shipping through CI/CD in agile, distributed teams.

EXPERIENCE

Broadpoint Group — Frontend Developer Aug 2025 – Present · Remote

Contract for MasterBrand (North America's largest cabinet manufacturer) · Rebode consumer platform, rebode.us

- Built Rebode's **universal navbar from scratch** as a React 19 + TypeScript package in a Turborepo/pnpm monorepo, with Kontent.ai content, auth state, Zustand store and mobile navigation; shipped **12 versioned releases** via Changesets and Azure Pipelines, consumed by 4 Next.js apps.
- Delivered **Virtual Designer v1.0–1.4** in the kitchen-remodel journey: Calendly consultation booking, dealer listings with optimized map loading, image upload/share and PDF export; refactored consultation logic into smaller, typed components.
- Built the end-to-end **Connect Now** dealer-connection flow on the Next.js App Router: CMS-driven UI, server-side Calendly fetching, session/proxy-expiry handling, ZIP code moved from URL to cookies, and user data synced across apps.
- Integrated partner flows (iCabinetry, PDQ, Travek) and built the streamlined ZIP-code entry, planning-tools page and cost-estimator entry points.
- Instrumented **Amplitude** events across the navbar, Connect Now and Virtual Designer funnels, giving product teams conversion data for decisions.
- Upgraded the hub app's React version and bootstrapped a new Next.js marketing landing-page app with CMS preview mode, OneTrust consent and analytics.
- Merged **116 pull requests across 6 production repositories**, writing Vitest / React Testing Library tests and taking part in code reviews.

Freelance — Frontend Developer Mar 2025 – Jul 2025 · Remote

- Built responsive websites and web apps for small-business clients with React, Next.js and Tailwind CSS, from Figma designs to deployment.
- Created reusable component sets, integrated REST APIs and improved SEO and Core Web Vitals for client sites.

Softobiz Technologies — Frontend Developer Jul 2022 – Feb 2025 · Mohali, India

- **ClientPoint** (US B2B sales-enablement SaaS, Next.js): built a reusable MUI-based component library used across teams; managed complex state with Redux Toolkit; delivered **20+ feature launches**.
- Improved performance with lazy loading, code splitting and memoization, raising Lighthouse performance scores.
- **Sustainability platform** (Australian enterprise; React, NestJS, PostgreSQL): theme setup, Figma-to-Material-UI build, role-based access for buyers and sellers, multi-step forms and PDF upload/download.
- **TourO Bikes** (bike-rental platform): booking flows, authentication and live rental updates with Redux Toolkit and Context API; vendor and admin portals.
- **Peak IT** (US project-management platform; React, AWS Lambda) and **Aurora Home Inspection** (React, Chakra UI): REST API integration, file uploads, ticketing, memberships and staff management; contributed to technical specs in agile sprints.

SKILLS

Languages	TypeScript, JavaScript (ES2022+), HTML5, CSS3 / SCSS
Frameworks & State	React 19, Next.js (App & Pages Router), Redux Toolkit, Zustand, React Query, SWR, React Hook Form, Zod
UI	Tailwind CSS, Material UI, Chakra UI, Framer Motion, responsive & cross-browser design
CMS, Analytics, Auth	Kontent.ai (headless CMS), Amplitude, Google Tag Manager, Auth0
Testing & Tooling	Vitest, Jest, React Testing Library, Turborepo, pnpm, Vite, tsup, Changesets, Git, Azure DevOps CI/CD, Jira

EDUCATION

B.Tech, Computer Science & Engineering — Chandigarh Group of Colleges, Landran (Mohali) · CGPA 7.8 2018 – 2022
